

A tensile fabric triple coned umbrella with a tubular steel columns

Swift

- Wide range of fabric colours available
- Accessories include lighting & IR heating
- Wide range of sizes available
- Warranted for ten years under tension
- ArcCan installation teams operate Worldwide

Often specified for schools, home and garden, restaurants, and hotels, this permanent umbrella style structure has exceptionally strong tubular steel columns with horizontal radiating spars secured with tubular steel struts.

The canopy is a patterned tensile fabric triple cone with graceful scalloped edges. Fully engineered to withstand the worst weather imaginable, the Swift makes a statement wherever it is installed.
